

Diana Balboni is One of Only a Few Female Automotive Detailers in the U.S.

Who says detailing is a man's business?

For Diana Balboni, auto detailing is the art and science of restoring an aging vehicle to as close as possible, showroom condition; and maintaining a new vehicle at an exquisite, 'like new' level of care.

Auto detailing today uses advanced aesthetic technology to help retain your vehicle's value, and add considerable value to an aging or neglected vehicle. In short, it protects your automotive investment and puts more money in your pocket when you get ready to sell or trade!

Diana offers exceptional service and a great product, at a fair price.

Dual Certification by the International Detailing Association

Diana Balboni is a certified member (CD) of the International Detailing Association and holds an advanced Skills Validated (SV) certification with the organization.

As an IDA member, N2 Details is held to a higher quality standard than non-certified detailers.

Car owners can be assured IDA members are tested and certified according to strict industry standards determined by leading industry professionals.

The SV designation means Diana Balboni has passed challenging hands-on testing in the field for her abilities.

Certified by the Detailing Success Network

Diana Balboni is also certified by Renny Doyle's Detailing Success, the nation's foremost Master detailing trainer, known as the "Detailer of Air Force One".

Detailing Success detailers receive certifications in detailing business, paint correction, interior and exterior detailing, the installation of ceramic coatings, and headlight restoration.

Clean, Safe & Healthy Car Interiors

Think about what you inadvertently bring into your vehicle on your shoes, hands, and clothes. You transfer mud, dirt, body sweat, hand oil, hair and food particles onto your steering wheel, control buttons, upholstery and carpets. Stop at the pump and add gas, oil, and grease to it.

There are germs and bacteria on your purse, grocery bags, briefcase, and backpack. Moisture caused by rain, dew, snow and ice on raincoats, umbrellas, beach towels, and sports equipment quickly cause musty odors, mold and mildew - not to mention everyday spills, drops and sloshes!

N2 Details specializes in European steam and stain removal that zaps odor-causing stain residuals at the source,

Using 300-degree vapor mixed with green chemical technology, we can sanitize and decontaminate every interior surface including HVAC vents where pollen and allergens hide. Better yet, European steam leaves your upholstery and carpets fresh and dry. Unlike traditional shampoos.

Finally, we deep clean upholstery seams, crevices, door and seat pockets, cup holders, the dashboard

and console; and finish it off with an antibacterial treatment and protective coating that offers long-term protection that repels further spills and stains caused by pet accidents or kid grime, ..!

Every N2 interior detail is like giving your vehicle a flu shot!

Clay Bar & Paint Enhancement to Restore Your Shine

The environment is a nightmare for your car paint. Migratory bird droppings, kamakaze bugs, snow and ice during the winter, the blazing hot sun during the summer, traffic exhaust and industrial fallout from Virginia's economy ... it all contributes to the build-up of dangerous contaminants on your paint surface.

These contaminants embed themselves in your clear coat to create rough spots and etches that do not simply wash off with soap and water, in fact, acidic bird droppings are 100 percent insoluble in soap and water!

Using a special detailers clay, N2 Details safely and effectively removes these contaminants from the paint surface, and then buffs it out to a gloss that is "squeaky clean".

Between that and chemical oxidation that causes your paint to fade and become cloudy in a very short span of time, you need a paint enhancement specialist like Diana Balboni to maintain your paint at a healthy level of clean.

Specialization in Restoring Classic Automobiles

You can't drive a car forever, but you can keep it forever! Whether you stole your first kiss in the front seat, or drove your high school sweetheart to the prom in it, car enthusiasts are nostalgic about their favorite cars ... and any aging favorite can become a classic if cared for properly.

When an older model vehicle shines up like it was new and rides like a clean dream, it is rarely because it has been forever well cared for!

Diana Balboni specializes in revitalizing aged and neglected vehicles - inside and out!

Get a FREE estimate on what it will take to bring old Tin Lizzy back to her original shine!
